

User Manual — ARKA PCR

Planned Component Replacement Monitoring System

Panduan lengkap memakai aplikasi **ARKA PCR**: merencanakan, menyetujui, mengeksekusi, dan memonitor penggantian komponen alat berat secara terjadwal, plus proses **Cannibal BA** (transfer komponen antar unit).

Dokumen	User Manual Aplikasi ARKA PCR
Versi	2.0
Tanggal	27 Agustus 2026
Bahasa	Bahasa Indonesia (istilah teknis tetap dalam bahasa Inggris)
Audiens	Plant site, requestor, logistics, dan approver

Screenshot diambil dari aplikasi yang sedang berjalan. Tampilan mengikuti **permission** dan **project** pada akun Anda — menu atau tombol yang tidak muncul biasanya berarti Role Anda tidak punya izin tersebut.

1. Pengenalan Aplikasi

ARKA PCR adalah sistem web untuk monitoring **Planned Component Replacement** pada alat berat operasional pertambangan. Aplikasi membantu tim plant:

- mencatat **Hour Meter (HM)**
- merencanakan penggantian berdasarkan **Life % (PCR Forecast)**
- mengajukan **BA PCR** dan mendapatkan **Approval**
- mengeksekusi **Work Order (WO / Replacement)**
- memonitor kondisi komponen lewat **SOS, Inspection**, dan **Condition**
- mendokumentasikan **Cannibal BA** (REMOVE dari unit sumber, INSTALL ke unit tujuan)

Data unit dan model berasal dari **ARKFleet** (cache lokal). Lookup material (P/N) dan dokumen WO / MR / PR / PO terhubung ke **SAP B1** bila konfigurasi server aktif.

Siapa yang memakai aplikasi ini?

Role	Fokus penggunaan
Plant Foreman / Supervisor	Operasional harian: Forecast, Replacement, SOS, Inspection, Cannibal, Reports
Supt. Production	Konfirmasi Request By pada Cannibal BA (bukan approver PS)
Logistics	Mengisi Logistic Statement pada Cannibal BA
Plant Superintendent	Operasional + master data + approve level PS
Project Manager (PJO)	Approve level PM (project-scoped)
Plant Manager	Approve BA PCR PLM ; Cannibal PGM (via project 000H)
Operational GM	Approve Cannibal level OGM
Operational Director	Approve level OD
Commercial & Treasury Director	Approve BA PCR level FD
President Director	Approve BA PCR & Cannibal level PD

Menu yang Anda lihat mengikuti **permission** dan **project** yang dilampirkan pada akun Anda. Pengelolaan akun, Role, dan Project dilakukan Administrator (tidak dibahas di manual ini).

BA PCR ≠ Cannibal BA. Keduanya dokumen, menu, dan rantai approval yang berbeda. Jangan dicampur.

2. Istilah Penting (Glossary)

Istilah	Arti singkat
Unit	Alat berat di site (cache dari ARKFleet)
Project	Kode lokasi/proyek operasi (project_code)
000H	Kode Head Office — akses ke semua project
Model	Tipe/model unit

Istilah	Arti singkat
Component	Master kategori komponen
Commod	Mapping Model ↔ Component + policy (umur) & harga
Policy	Target umur komponen (jam)
Hour Meter (HM)	Jam kerja unit
Life %	Persentase umur komponen terhadap Policy
PCR Forecast	Rencana penggantian komponen
BA PCR	Berita Acara untuk approval rencana PCR
Replacement / PCR Actual / WO	Work Order aktual penggantian komponen
Convert	Mengubah Forecast yang sudah approved menjadi WO
Cannibal / Kanibal	Transfer komponen REMOVE ↔ INSTALL antar unit
BA (Cannibal)	Berita Acara proses cannibal (terpisah dari BA PCR)
Plant Statement	Justifikasi plant: P1 Unit RFU, Production Requirements, atau Other
Request By	Jabatan yang menandatangani permintaan kanibal (bukan creator BA)
Requestor	User yang dipilih untuk konfirmasi Request By
Logistic Statement	Justifikasi logistics: No Stock, Lead Time Part, atau Other
SOS	Sample Oil System — hasil analisa oli
Inspection	Hasil inspeksi komponen (tipe FC, MPS, VI, TA2, ED)
Condition / CBM	Ringkasan kondisi komponen dari SOS + inspeksi
Ach %	Achievement = Close / Total
SAP B1	Integrasi lookup material (P/N) dan dokumen WO/MR/PR/PO
Role / Permission	Jabatan dan izin akses modul

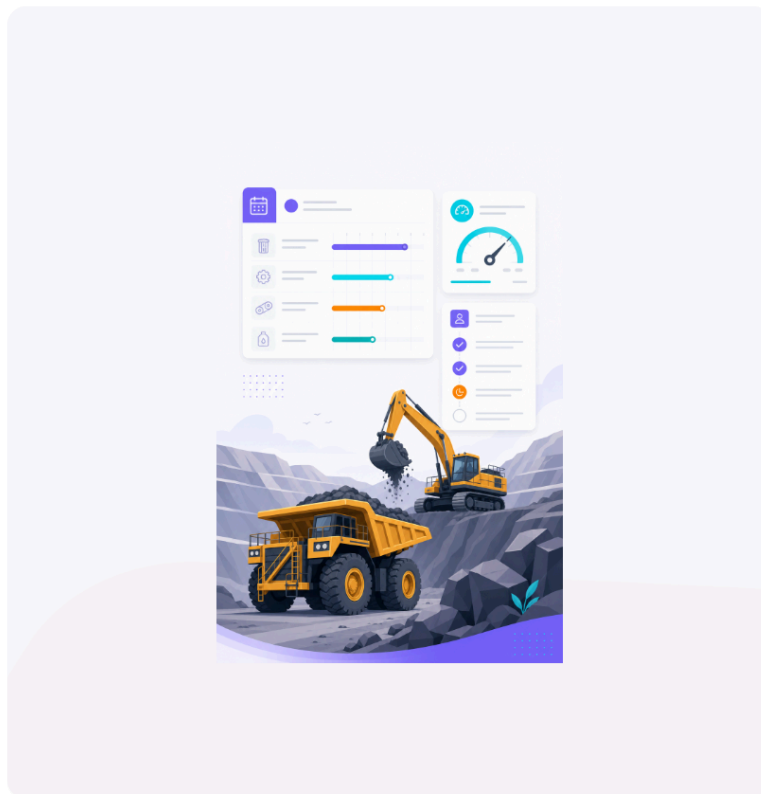

Rumus Life % (konsep):

$$\text{Life \%} \approx (\text{HM sekarang} - \text{HM ganti terakhir} + \text{jam komponen terpasang}) / \text{Policy} \times 100$$

3. Login & Akun Pengguna

Cara membuka

Buka alamat aplikasi di browser. Anda akan diarahkan ke halaman **Login** (/login).

 **ARKA PCR**

Welcome to ARKA PCR! 

Sign in with your username and password

Username

Enter your username

Password

.....

Login

New on our platform? [Create an account](#)

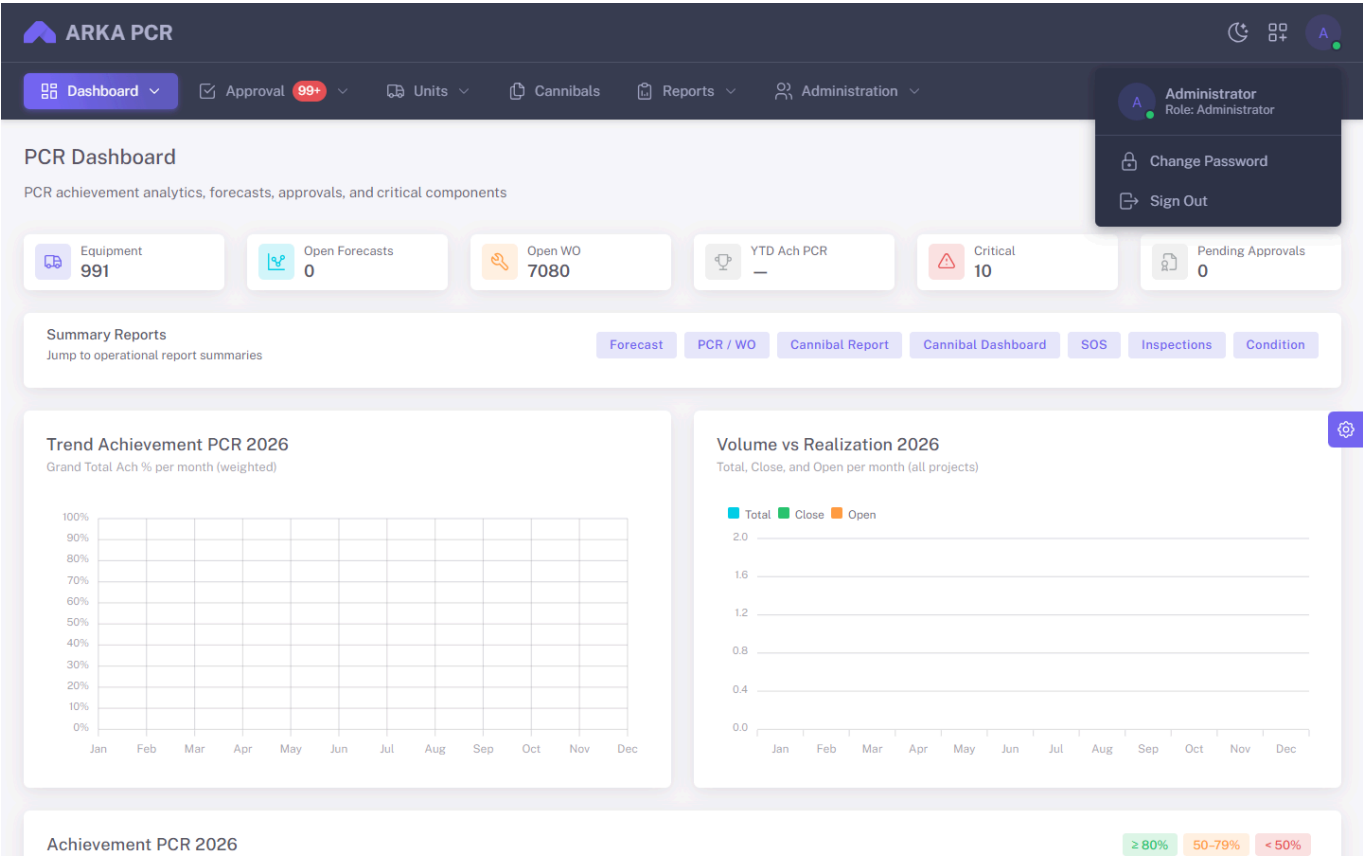

Gambar 1 — Halaman Login: masukkan Username dan Password.

Langkah login

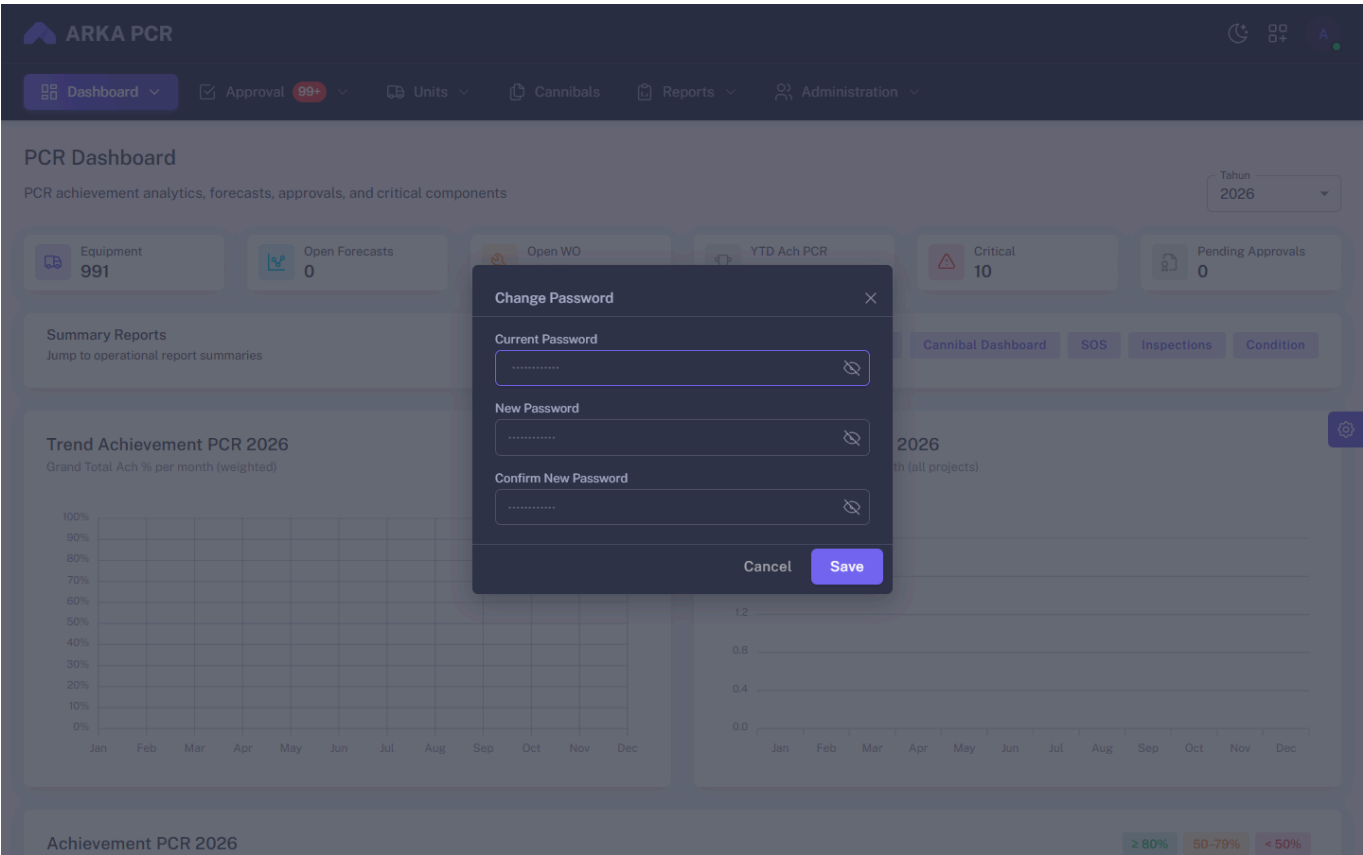

1. Isi **Username**.
2. Isi **Password**. Gunakan ikon mata untuk menampilkan/menyembunyikan password.
3. Klik **Login**.
4. Jika berhasil, Anda masuk ke **PCR Dashboard**.

Catatan akun

- Link **Create an account** membuka registrasi. Akun baru biasanya **inactive** sampai diaktifkan Administrator.
- Jika Username/Password salah, muncul pesan error di form.
- Untuk keluar: klik avatar di pojok kanan atas → **Sign Out**.
- Untuk ganti password sendiri: avatar → **Change Password**.

Gambar 2 — Menu user: Change Password dan Sign Out.

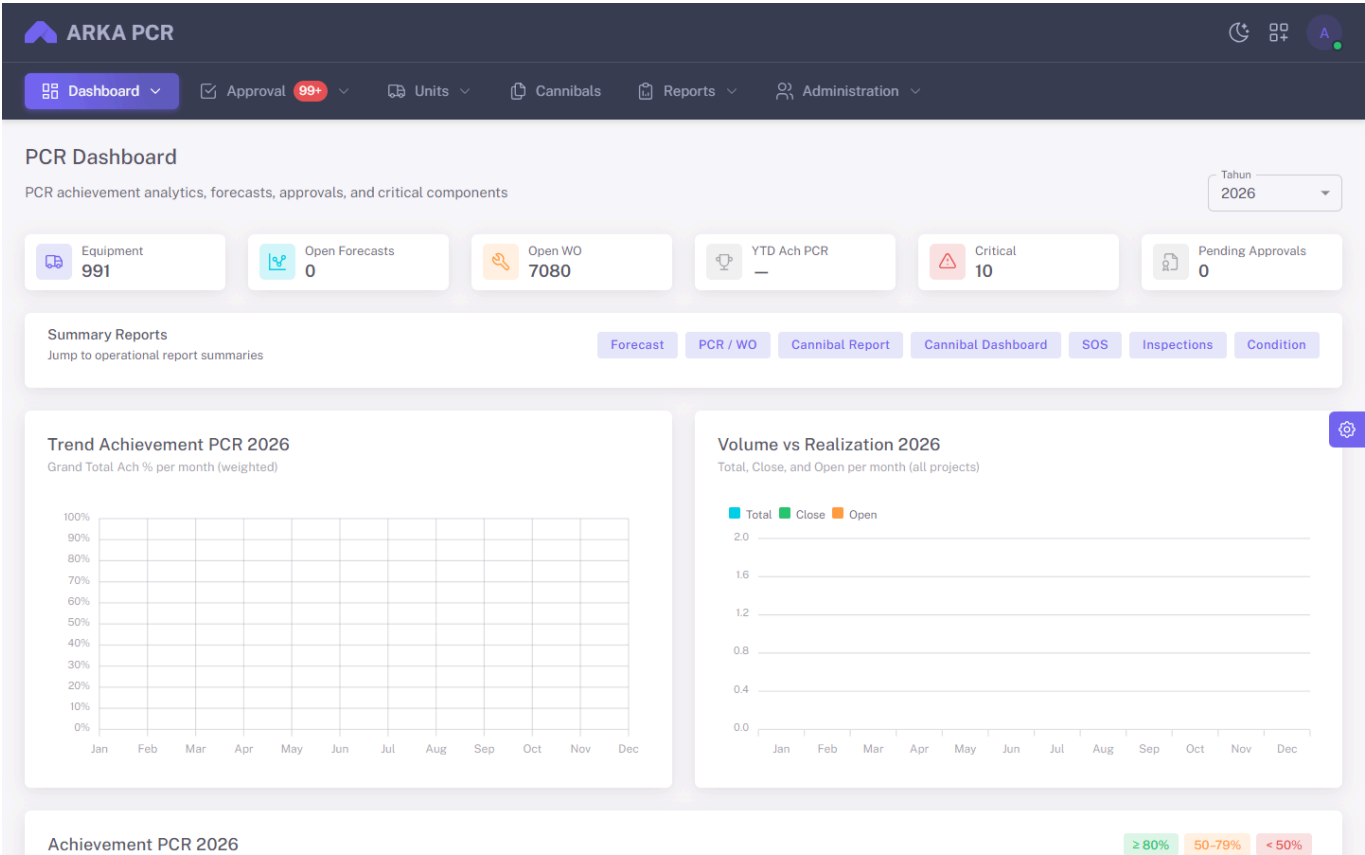

Gambar 3 — Dialog Change Password: current, new, dan confirm password.

Isi **Current Password**, **New Password**, **Confirm New Password**, lalu **Save**.

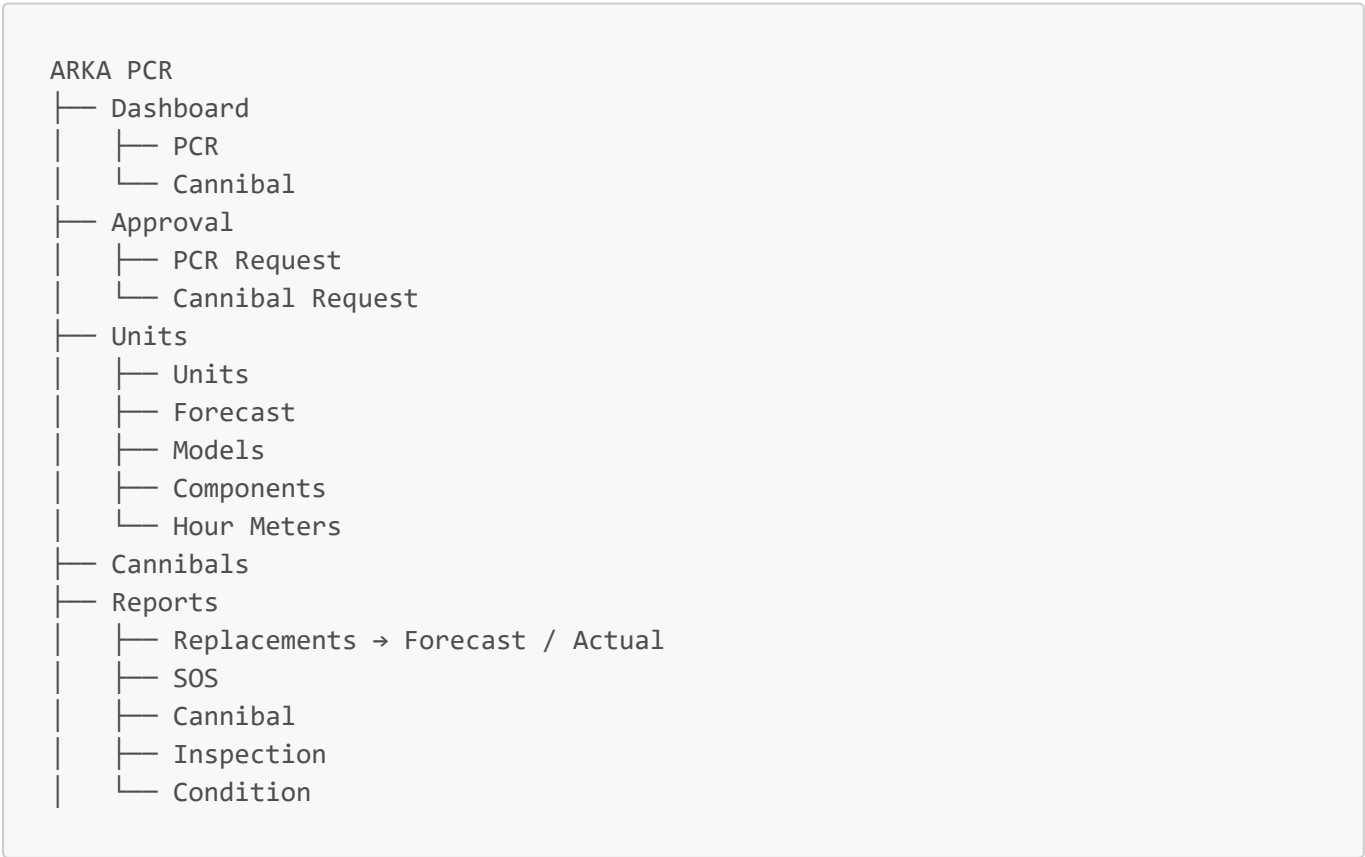

4. Navigasi & Tampilan Umum

Setelah login, layout memakai **menu horizontal** di bagian atas.

Gambar 4 — Menu utama ARKA PCR di header.

Struktur menu

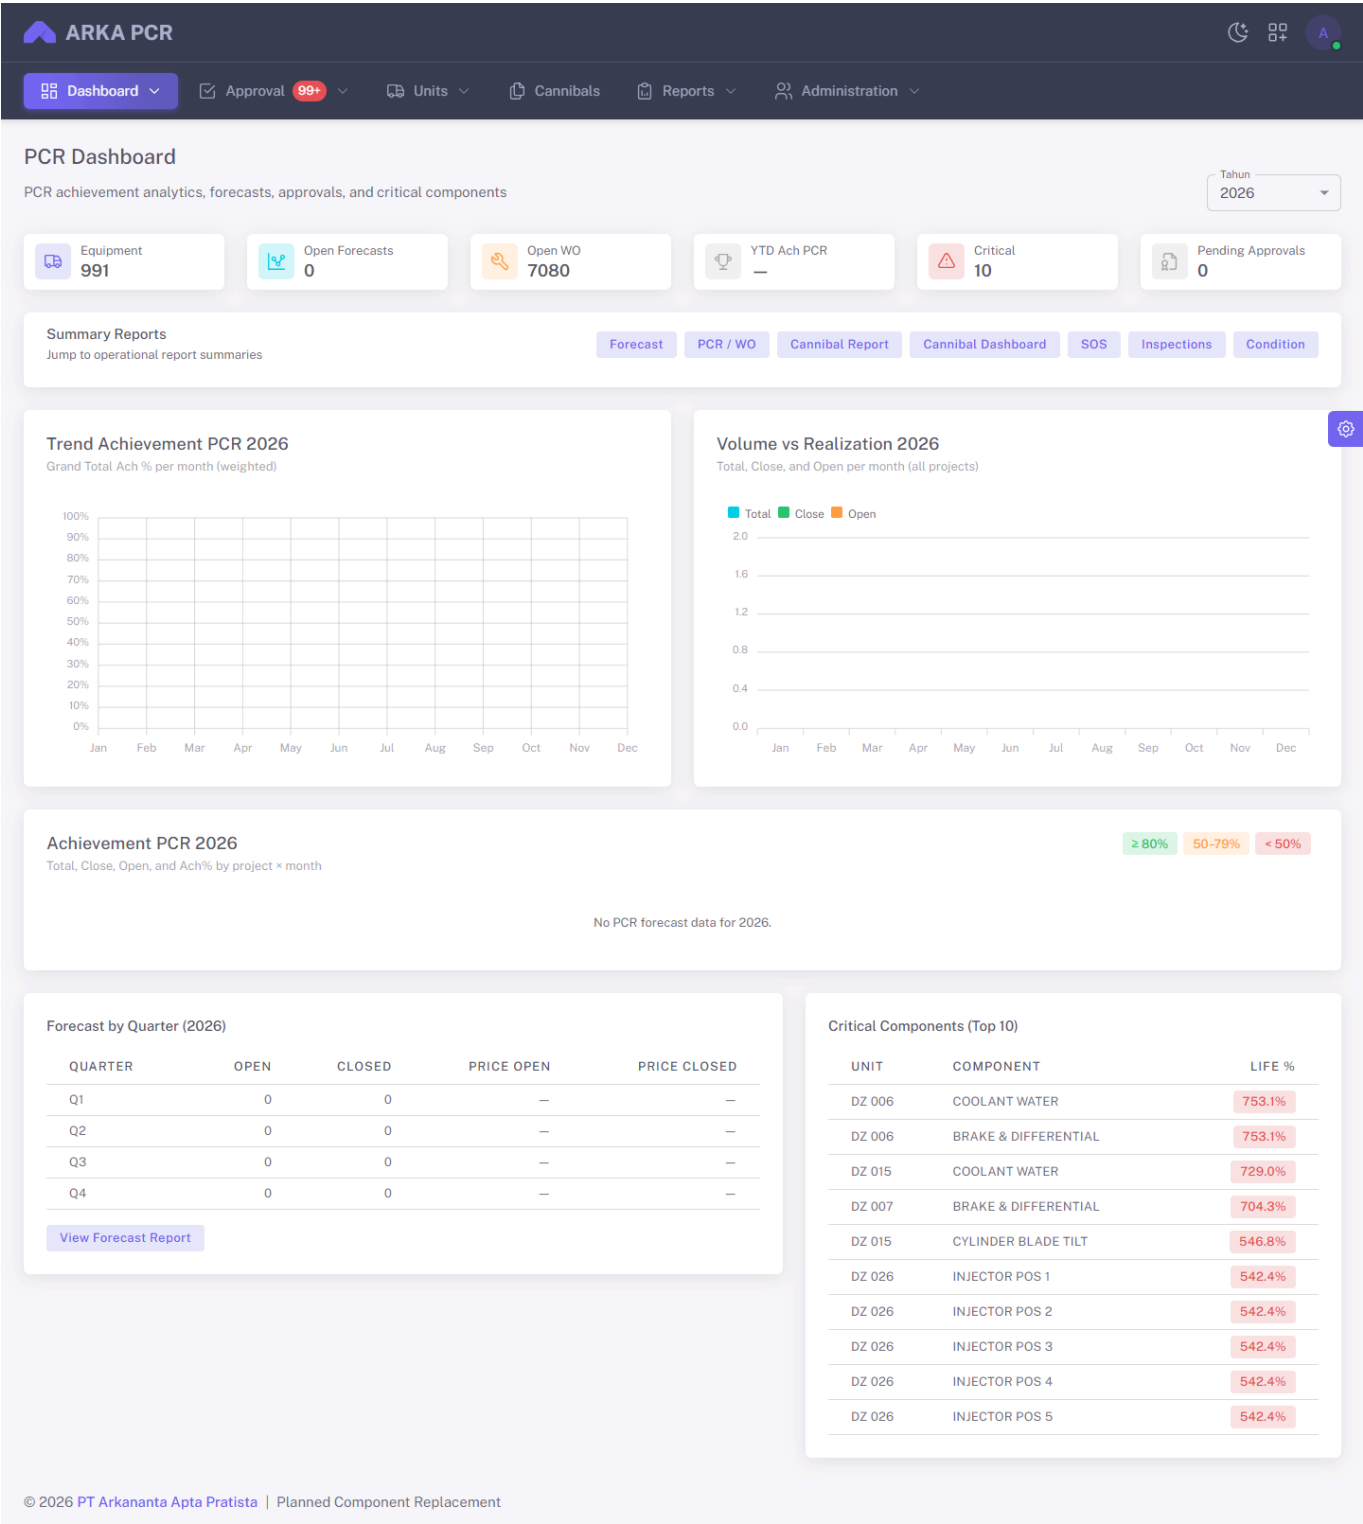

- Item menu hanya muncul jika akun punya **permission** terkait.
- Menu **Approval** bisa menampilkan **badge** jumlah antrian.
- Ikon **bulan** di kanan header mengganti light/dark mode.
- Ikon **gear** di tepi kanan layar adalah pengaturan tampilan template (opsional), bukan bagian proses PCR.

Permission menentukan *apa* yang boleh dilakukan (submit, approve, export). **Project** menentukan *data site mana* yang terlihat. Kode **000H** (Head Office) membuka semua project. Jika permission approve ada tetapi Project tidak sesuai, dokumen site tidak muncul.

5. Dashboard PCR

Tujuan: ringkasan kinerja PCR (KPI, tren Achievement, komponen kritis).

Menu: **Dashboard** → **PCR**

Gambar 5 — PCR Dashboard: KPI, shortcut report, grafik Ach %, dan komponen kritis.

KPI yang ditampilkan

Kartu	Arti
Equipment	Jumlah unit di cache Fleet
Open Forecasts	Forecast berstatus OPEN
Open WO	Work Order yang masih OPEN
YTD Ach PCR	Achievement year-to-date (Close / Total rencana)

Kartu	Arti
Critical	Komponen dengan Life % $\geq$ 85%
Pending Approvals	Antrian BA PCR + Cannibal

Filter **Tahun** di kanan atas mengubah seluruh grafik dan tabel Achievement.

Cara memakai

1. Buka **Dashboard** → **PCR**.
2. Pilih tahun.
3. Gunakan **Summary Reports** untuk loncat ke report terkait.
4. Cek **Critical Components (Top 10)** untuk prioritas harian.
5. Tabel **Achievement PCR** memakai warna: hijau $\geq$ 80%, oranye 50–79%, merah $<$ 50%.

Jika belum ada Forecast untuk tahun tersebut, grafik Achievement bisa kosong. Open WO dan Critical tetap terisi dari data Replacement / Life %.

6. Dashboard Cannibal

Tujuan: melihat pipeline Cannibal BA, achievement per project, dan backlog approval.

Menu: **Dashboard** → **Cannibal**

7. Units

Tujuan: melihat daftar unit alat berat dan membuka hub operasional per unit.

Menu: [Units](#) → [Units](#)

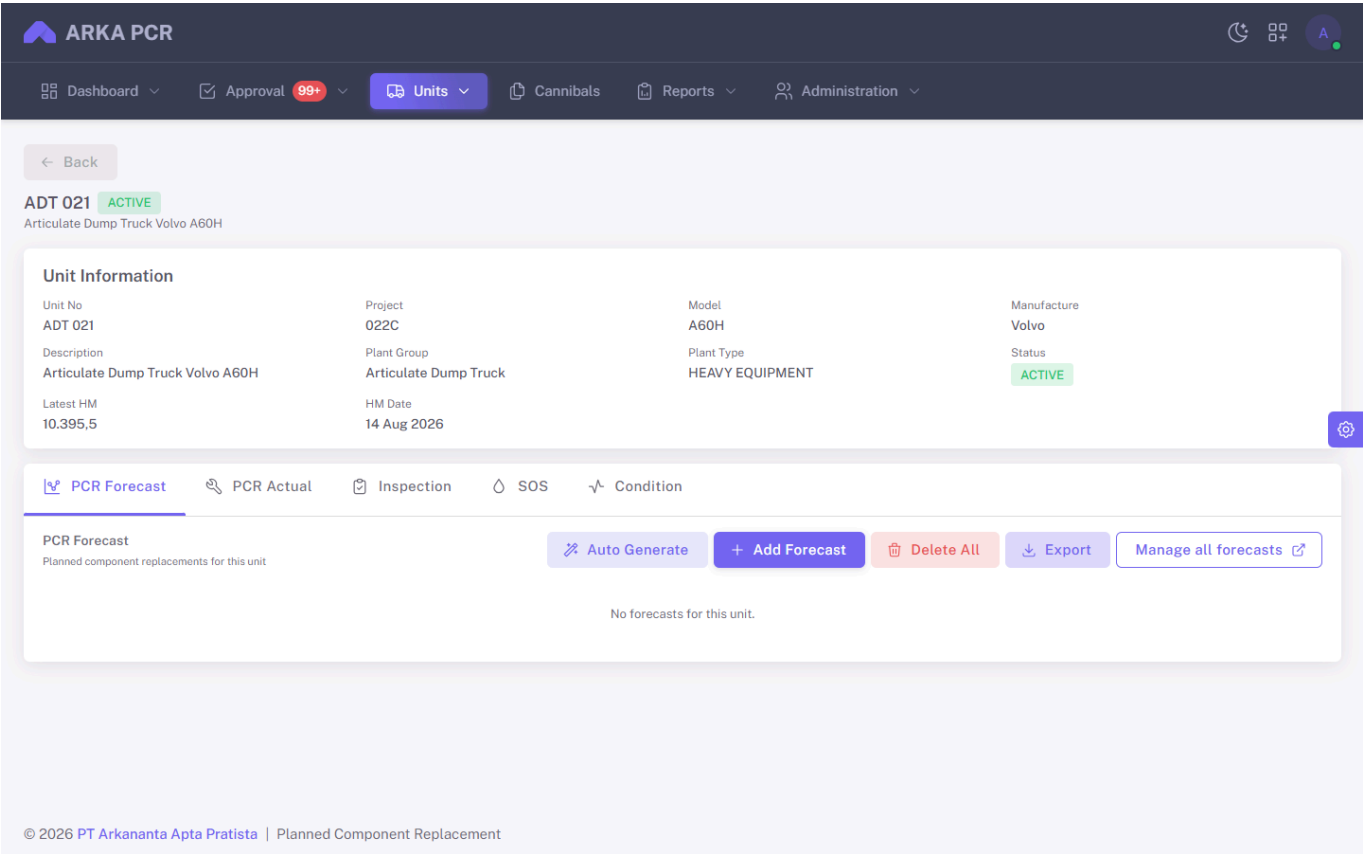

Gambar 7 — Daftar Units: filter, Sync from ARKFleet, dan aksi lihat detail.

Langkah umum

- 1. Buka **Units**.
- 2. Filter **Unit No**, **Model**, **Project**, **Manufacture**, **Plant group**, **Status**.
- 3. Klik ikon mata pada baris, atau klik baris, untuk membuka **Unit Detail**.
- 4. Administrator dapat **Sync from ARKFleet** agar cache unit/model diperbarui.

Unit bersifat **read-only** di PCR. Perubahan lokasi di masa depan tidak mengubah snapshot transaksi lama.

Unit Detail

Gambar 8 — Unit Detail ADT 021: info unit, HM terakhir, dan tab PCR Forecast.

Header menampilkan nomor unit, status (mis. **ACTIVE**), model, project, dan **Latest HM**.

Tab di Unit Detail

Tab	Fungsi
PCR Forecast	Rencana PCR untuk unit ini
PCR Actual	WO / Replacement per komponen
Inspection	Rating inspeksi terakhir per tipe
SOS	Sample oil terakhir per komponen
Condition	Ringkasan CBM (NORMAL / ATTENTION / CRITICAL)

Dari tab Forecast Anda bisa **Auto Generate**, **Add Forecast**, atau **Export**. Dari tab Actual, klik baris/komponen untuk membuka **Replacement Detail**.

Gambar 15 — Hour Meters: filter project/unit/tanggal, Add, Import, Export.

Input manual

1. Buka **Hour Meters**.
2. Filter Project / Unit / tanggal jika perlu.
3. Klik **Add Hour Meter** (atau Edit pada baris).
4. Isi unit, tanggal, dan nilai HM.
5. Simpan.

Import / Export Excel

1. **Export Excel** mengunduh data sesuai filter aktif.
2. **Template** mengunduh format kosong.
3. **Import Excel** mengikuti panduan di dialog (baris kosong dilewati; upsert berdasarkan id HM atau kombinasi unit + tanggal).

Tips: isi HM rutin agar Life % dan Forecast akurat.

10. PCR Forecast & BA PCR

Tujuan: merencanakan penggantian, lalu mengajukan **BA PCR**.

No rows										

Rows per page: 10 0-0 of 0

© 2026 PT Arkananta Apta Pratista | Planned Component Replacement

Gambar 16 — PCR Forecast: filter Quarter/Status/BA PCR/Project/Plan Period, Auto Generate, Add Forecast.

Jika tabel **No rows**, site belum punya Forecast OPEN. Generate dulu atau **Add Forecast** manual.

Status Forecast

- **OPEN** — masih aktif; biasanya bisa diedit.
- **CLOSED** — sudah ditutup (umumnya setelah WO terkait closed dengan PO).

Membuat / generate Forecast

1. Buka **Forecast**.
2. Filter Project / Quarter / Plan Period.
3. Klik **Auto Generate** (butuh Commod + HM yang memadai) atau **Add Forecast**.
4. Tinjau **Life %**, **SOS/CBM rating**, dan **Plan Periode**.
5. **Bulk Refresh** memperbarui kalkulasi baris yang sudah ada.

Aturan: umumnya hanya ada **satu Forecast OPEN** per pasangan Unit + Component.

Submit BA PCR

1. Pada baris Forecast, buka **Actions** → **Submit BA PCR** (permission `forecasts.submit`).
2. Sistem membuat/mengaktifkan dokumen **BA PCR** dan baris approval.
3. Status masuk antrian **Approval** → **PCR Request**.

Dari **Actions** juga tersedia **View Detail**, **Convert to WO** (setelah BA approved), dan **View Replacement** bila sudah dikonversi.

Setelah BA approved

- **Convert to WO** membuat Replacement / Work Order.
- Menyetujui BA **tidak** otomatis menutup Forecast.
- Forecast biasanya **CLOSED** ketika WO terkait ditutup dan **PO No** terisi.

Print BA PCR

Dari detail Forecast, buka print ([/forecasts/\[id\]/print](/forecasts/[id]/print)) untuk mencetak dokumen BA.

Reject & Resubmit

1. Riwayat reject tetap tersimpan.
2. Tim plant memperbaiki data lalu **Resubmit**.
3. Resubmit membuat **BA PCR baru** (nomor baru); BA lama tetap sebagai sejarah.

11. Approval PCR Request

Tujuan: approver meninjau dan menyetujui/menolak **BA PCR**.

Menu: [Approval](#) → [PCR Request](#)

ARKA PCR

Dashboard Approval 99+ Units Cannibals Reports Administration

Forecast Approvals

Open forecasts with BA PCR — awaiting your approval (Plant Superintendent / Dept Head, Project Manager, Plant Manager, Operation Director, Commercial & Treasury Director, President Director). Open Review to approve or reject.

Unit No. Quarter Status BA PCR Pending Approval Stage Site Plan Period

© 2026 PT Arkananta Apta Pratista | Planned Component Replacement

Gambar 17 — Forecast Approvals: filter Unit/Quarter/Status BA/Approval Stage/Site/Plan Period.

Antrian kosong berarti belum ada BA PCR yang menunggu level Anda (atau Forecast belum di-submit).

Rantai approval BA PCR

Urutan tahap:

1. **PS** — Plant Superintendent / Dept Head (project-scoped)
2. **PM** dan **PLM** (sejajar)
3. **OD**, **FD**, dan **PD** (sejajar)

Kode	Jabatan
PS	Plant Superintendent / Dept Head
PM	Project Manager
PLM	Plant Manager
OD	Operation Director
FD	Commercial & Treasury Director
PD	President Director

Cara approve / reject

1. Buka **Approval** → **PCR Request**.
2. Filter dokumen yang menjadi tanggung jawab level Anda.
3. Klik **Review**.
4. Baca ringkasan Forecast / BA dan timeline approval.
5. Klik **Approve** atau **Reject** (sertakan catatan jika diminta).

Anda hanya bisa bertindak pada level yang sesuai permission (`forecasts.approve.PS`, `.PM`, `.PLM`, `.OD`, `.FD`, `.PD`).

12. PCR Actual (Replacement / WO)

Tujuan: mencatat eksekusi penggantian komponen di lapangan.

Cara buka:

- Tab **PCR Actual** di Unit Detail, atau
- **Actions** → **Convert to WO** pada Forecast yang sudah approved, atau
- **Replacement Detail** per komponen: `/units/[id]/replacements/[idMod]`

Rows per page: 25 1-2 of 2

© 2026 PT Arkananta Apta Pratista | Planned Component Replacement

Gambar 18 — Replacement Detail: info unit & komponen, riwayat WO, status OPEN/CLOSE, tautan SAP WO#.

Alur umum

1. Buat WO dari **Convert Forecast** atau **Add** di tab Actual.
2. Lengkapi tanggal, HM, komponen, catatan.
3. Hubungkan dokumen pengadaan bila tersedia (**WO / MR / PR / PO** via SAP B1 lookup).
4. Unggah report instalasi jika komponen mewajibkannya.
5. **Close** WO setelah pekerjaan selesai.
6. Koreksi setelah close: **Reopen / Edit Closed** (permission khusus).

Aturan penting

- Biasanya hanya ada **satu WO OPEN** per Unit–Component pada satu waktu.
- Menutup WO yang terkait Forecast sering mensyaratkan **PO No** terisi.
- Close WO dengan PO dapat ikut menutup Forecast terkait.

13. SOS, Inspection & Condition

Ketiga modul ini mendukung **condition-based monitoring** sebagai pelengkap perencanaan PCR. Buka dari **tab Unit Detail** atau dari **Reports**.

SOS (Sample Oil System)

- Dicatat per unit (tab **SOS** atau **Reports** → **SOS**).
- Berisi sample date, lab no, evaluation/rating.
- Tombol **Add SOS / Manage SOS records** sesuai permission.

Inspection

- Tipe: **FC, MPS, VI, TA2, ED**.
- Isi tanggal, HM, komponen, dan rating.
- **Add Inspection** membuka drawer input.

Condition

- Ringkasan keseluruhan komponen (agregat SOS + inspeksi).
- Chip: **NORMAL, ATTENTION, CRITICAL**.
- Tampil di grid Forecast/Actual dan **Reports** → **Condition**.

Praktik baik: lengkapi SOS & Inspection berkala agar keputusan Forecast lebih akurat.

14. Cannibal BA

Tujuan: mendokumentasikan transfer komponen antar unit (REMOVE dari unit sumber, INSTALL ke unit tujuan).

Menu: **Cannibals**

BA Cannibal ≠ BA PCR.

Gambar 19 — Daftar Cannibal BA: filter nomor BA, project, unit, P/N, status; Export; Create BA.

Kolom **Approval** menampilkan tahap (Draft, Pending Requestor, Dalam proses approval, dst.). Klik **Actions** pada baris untuk aksi sesuai status.

Tahapan status (Rev 5)

DRAFT / REJECTED

→ PENDING_REQUESTOR (Request By confirm/reject)

→ PENDING_LOGISTICS

→ PENDING_DOCUMENT (MR/PR + WO)

→ Approval (PS → PM → OGM → PGM → OD → PD)

→ APPROVED (Ready to Close)

→ CLOSED

Status lama **OPEN** pada data migrasi = dalam proses approval (atau sudah L1–L3 di sistem legacy).

Create BA

© 2026 PT Arkananta Apta Pratista | Planned Component Replacement

Gambar 20 — Create Cannibal BA: Plant Statement, Request By, status komponen, REMOVE / INSTALL.

Lengkapi:

1. **Project Code** dan **Posting Date**.
2. **Failure Description**.
3. **Plant Statement** — pilih **satu**: P1 Unit RFU, Production Requirements, atau Other.
4. **Cannibal Request By** — pilih **satu jabatan** (Supt. Production / PJO / GM Operation / GM Plant), lalu pilih **Requestor** (user yang memegang jabatan itu).
5. **Component Status** — Brand New, PEX/Reman, As Is Repair, atau Other. (RESEAL ONLY disembunyikan di form baru.)
6. **Component Transfer** — pasangan **REMOVE FROM** (oranye) dan **INSTALL TO** (hijau): Unit, tanggal, P/N, S/N, komponen, WO, HM Comp.
7. Klik **Create BA**.

Creator BA (Plant) **bukan** otomatis Requestor.

Langkah Plant setelah draft

1. **Send to Requestor** (dari detail atau Actions).
2. Requestor yang dipilih mendapat antrian **Confirm Request / Reject Request**.
3. Jika reject: BA kembali ke Plant (status **REJECTED**). Plant boleh edit lalu submit ulang — selalu masuk **PENDING_REQUESTOR** lagi.
4. Setelah requestor confirm → **Pending Logistics**.

Langkah Logistics

1. Buka BA **Pending Logistics**.
2. Isi **Logistic Statement** (No Stock / Lead Time Part / Other) → Confirm.
3. BA pindah ke **Record & Documentation**.

Record & Documentation

1. Isi **Planning** (action + **MR#** dan **PR#** wajib).
2. **Update Documentation** (WO + catatan + kelengkapan dokumen).
3. **Submit for Approval**.

Gambar 23 — Antrian Cannibal Request.

Rantai approval (berurutan)

1. **PS** — Plant Superintendent (project-scoped)
2. **PM** — Project Manager / PJO (project-scoped)
3. **OGM** — Operational General Manager
4. **PGM** — Plant General Manager
5. **OD** — Operational Director
6. **PD** — President Director

Approver HO (OGM / PGM / OD / PD) memakai project **000H** agar melihat semua project.

Cara review

1. Buka antrian **Cannibal Request**.
2. Buka **View Detail**.
3. Periksa pair REMOVE/INSTALL, Plant Statement, Request By, Logistic Statement, MR/PR.
4. **Approve** atau **Reject**.

Konfirmasi Request By **bukan** bagian rantai PS–PD; itu gerbang sebelum Logistics.

Gambar 29 — Summary Condition.

Matrix Forecast tambahan

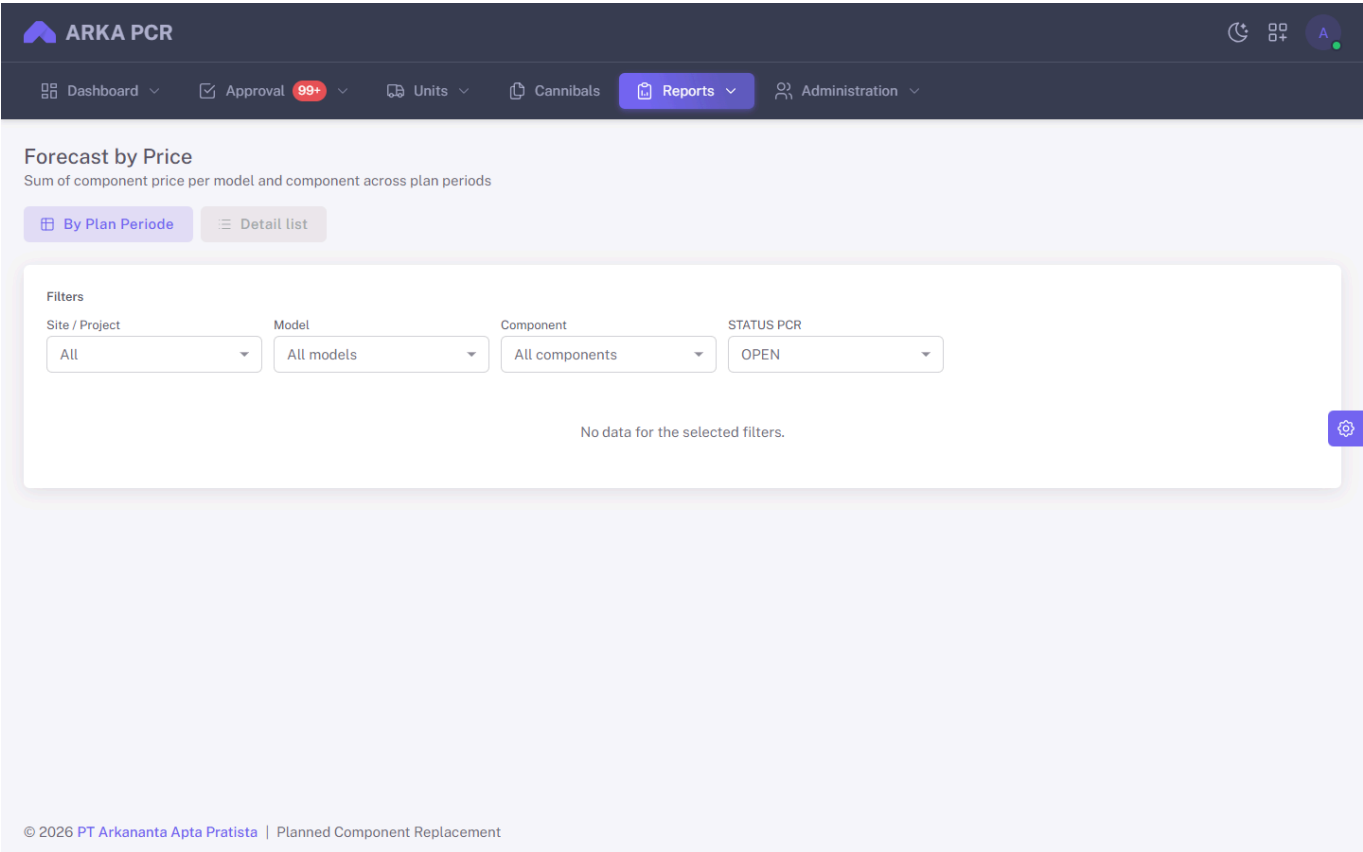

Dari report Forecast, buka:

- **By Plan Periode** — matrix Model × Component × periode rencana

Gambar 30 — Forecast by Plan Periode.

- **By Price** — matrix berbasis harga komponen

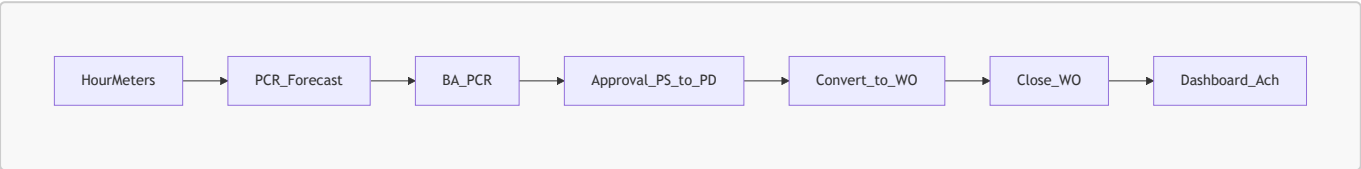

Gambar 31 — Forecast by Price.

Cara memakai report

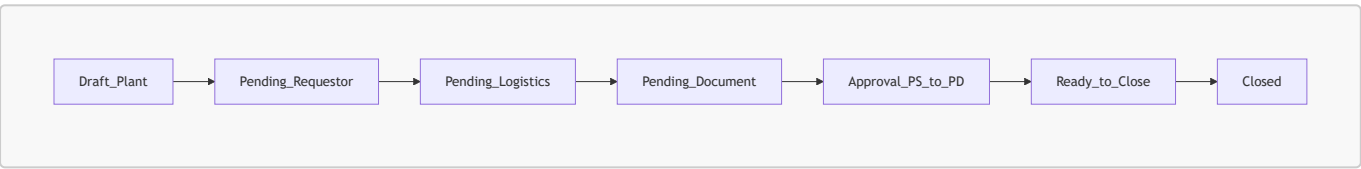

- 1. Buka report yang diinginkan.
- 2. Set filter (Project, Unit, Component, tanggal, status).
- 3. Gunakan pencarian kolom jika tersedia.
- 4. Klik **Export** (permission `exports.*` terkait).

17. Alur Kerja Ringkas

Alur PCR (Forecast → WO → Achievement)

Alur Cannibal BA (Rev 5)

Ringkasan yang sering dilupakan

- 1. HM rutin → Life % & Forecast lebih akurat.
- 2. Submit BA PCR ≠ Close Forecast.
- 3. Convert setelah BA approved → baru ada WO eksekusi.
- 4. Close WO (dengan PO jika disyaratkan) → Forecast bisa CLOSED.
- 5. Cannibal: Plant → **Request By** → Logistics → Documentation → Approval. Jangan lompat.
- 6. Creator BA ≠ Requestor.
- 7. BA PCR dan Cannibal BA **jangan dicampur**.

18. Tips & Troubleshooting

Gejala	Kemungkinan penyebab	Yang bisa dicoba
Menu tidak muncul	Permission / Role kurang	Minta Admin cek Role
Data project kosong	Belum di-assign Project	Minta Admin isi Projects (atau <code>000H</code> untuk HO)
Tidak bisa Submit BA PCR	Tidak punya <code>forecasts.submit</code> atau Forecast bukan OPEN	Cek Role & status Forecast
Forecast kosong	Belum Auto Generate / Commod atau HM kurang	Isi HM, cek Models/Commod, lalu Auto Generate
Tidak bisa Approve	Bukan giliran level Anda / permission level salah	Cek antrian & Role approve

Gejala	Kemungkinan penyebab	Yang bisa dicoba
Tidak bisa Confirm Request By	Akun Anda bukan requested_by pada BA itu	Plant pilih ulang requestor, atau login sebagai requestor
Life % tidak masuk akal	HM belum diisi / policy Commod salah	Update HM & cek Models/Commod
Unit tidak lengkap	Cache Fleet belum sync	Minta Admin Sync from ARKFleet
Gagal login	Password salah / user inactive	Reset via Admin; pastikan user aktif
Export gagal	Tidak punya permission export	Minta permission exports.* terkait
Lookup WO/P/N SAP gagal	Koneksi SAP B1 di server	Hubungi Admin / IT

Praktik baik harian (Plant)

1. Update **Hour Meters**.
2. Cek **Dashboard PCR** & komponen Critical.
3. Generate / tinjau **Forecast OPEN** dengan Life % tinggi.
4. Submit BA PCR yang siap.
5. Follow-up Approval, lalu **Convert to WO**.
6. Close WO + lengkapi dokumen SAP.
7. Lengkapi SOS/Inspection sesuai jadwal site.
8. Cannibal: lengkapi Request By + Logistics + MR/PR sebelum Submit for Approval.

* Approver melihat data sesuai project assignment (000H untuk level HO).

† Request By hanya jika user tersebut dipilih sebagai **requestor** pada BA (jabatan PJO = PM, GM Plant = Plant Manager, GM Operation = OGM).

Tanda "view" = akses lihat tanpa aksi operasional penuh (sesuai template Role).
